Issue details			
Reporting	The district reports its investment portfolio annually and also publishes a development-facing annual report. The Use of Proceeds and Impacts have been published during issuance but not in the future publications by the District.		
Company information	The Yuba Community College District is based in the Sacramento Valley in California. Two colleges are operated by the District, namely Yuba College and Woodland Community College along with Clear Lake Campus education center.		
Firsts, records and certifications			
Proceeds description	The District intends to use the proceeds for “acquisition, construction and equipping” of a 2.7 megawatt multi-campus solar photovoltaic system project. It also plans of using the funds to explore any energy-saving technology; however, the focus shall be on solar photovoltaic systems. The solar project is expected to cover almost two-thirds of the power needs of the campuses.		
Climate Bonds view	YCCD’s issuance presents a good example of how institutions can enable climate-saving changes whilst maintaining operational status quo. A large and recurring need of electricity within campuses is an important contributor to the energy demands around the world, and thus any systematic development in improving this system is highly encouraged by CBI. CBI hopes that the District reports the impacts from this project and also pursues other such projects in the future.
