<b>Firsts &amp; records</b>			
<b>Company information</b>	TLFF I Pte Ltd is a financing vehicle for the <a href="#">Tropical Landscapes Finance Facility</a> issued a 15-year multi-tranche sustainability bond deal, as <a href="#">part of a USD350m project</a> . The project is a JV between France's Michelin and Indonesia's Barito Pacific Group.		
<b>Use of proceeds</b>	Proceeds will finance a sustainable rubber plantation on heavily degraded land in the Jambi and East Kalimantan provinces of Indonesia. The plantation will cover 34,000ha out of 88,000ha, while the remaining land will used for conservation, aquaculture, land restoration and smallholder plantations, including bamboo, cocoa, coconut, coffee, palm and rubber.		
<b>Climate Bonds view</b>	There are social components to this issue, but the sustainable agriculture angle combined with conservation of nature corridors for endangered species and restoration of degraded land fit in with the Nature Based Assets category of the Climate Bonds Taxonomy and sustainable land use appears to be the prevalent use of proceeds. We would hope to see this confirmed in future reporting.
