<b>Issue details</b>			
<b>Reporting</b>	There will be annual verification reports conducted by DNV GL. These will be made available publicly on the issuer's website.		
<b>Company information</b>	<p>UBank is a digital bank subsidiary of NAB, targeted primarily at younger customers. It has been quite successful – between mid-2018 and March 2019, its customer base grew by 25% to over 500,000 customers.</p> <p>This product received Certification under the NAB SDG Green Bond Programmatic Certification, which began in 2018.</p>		
<b>Firsts, records and certifications</b>	This is the first retail term deposit product linked to green investments in the Australia market. It is also the world's first green fixed term retail deposit linked to assets Certified under the Climate Bonds Standard.		
<b>Proceeds description</b>	Through this product, retail clients can receive up to 2.55% interest on their savings. The proceeds will be used to fund a portfolio loans on renewable energy projects such as wind and solar energy and low carbon buildings, originated under NAB's SDG Green Bond programme, which is Certified under the Climate Bonds Standard.		
<b>Climate Bonds view</b>	<p>The younger demographic tends to care more about the environmental impacts of its investments, so the target segment is not surprising. Deposit products provide an easy way for retail investors to contribute towards the transition to a low-carbon economy. We are pleased to see this type of product being developed, which should increase the visibility of green bonds and green assets within the general public, and hope other financial institutions around the world create similar options for retail investors.</p> <p>For further examples of green retail products, please see our recent Green bonds state of the market 2018 report, which featured a spotlight on green retail products (p. 20).</p>
