<b>Issue details</b>	
Reporting	No reporting commitment disclosed.
Company information	New Jersey Resources is a Fortune 1000 company providing natural gas and renewable energy services, including transportation, distribution, asset management and home services. A leader in New Jersey’s clean energy marketplace, NJR invests in, owns and operates green projects that provide low-carbon energy solutions. Since 2009, NJR has invested nearly USD800 million in its portfolio of residential and commercial solar projects adding up to a total installed capacity of 272MW.
Firsts, records and certifications	The first New Jersey corporate to enter the green bond market.
Proceeds description	The proceeds will support the company’s clean energy investments in the fiscal year 2019, including six commercial solar installations (a total of 50 MW).
Climate Bonds view	We are pleased to see more corporates – especially medium-sized companies – leveraging the yet latent potential of the US green bond market. We would encourage New Jersey Resources to provide post-issuance reporting. Commissioning an external review for their bond would also be in line with market best practice.
