Assurance Report on Pre-issuance of China Development Bank Green Financial Bond

March 2022

Scope and Objectives

Issuer

China Development Bank (hereinafter referred to as "CDB" or "issuer") was established in 1994 and is a policy financial institution directly under the leadership of the State Council of China. The registered capital of China Development Bank is 421.248 billion yuan. The shareholders are the Ministry of Finance of the People's Republic of China, Central Huijin Investment Ltd., Wutong Tree Investment Platform Ltd. and the National Council for Social Security Fund. And their shareholding ratios are 36.54%, 34.68% and 27.19%, 1.59% respectively. The China Development Bank mainly serves the major medium-term and long-term development strategies of the national economy through financial services such as medium-term and long-term credit and investment.

Bond Information

A Green bond, named "China Development Bank 2022 Green Financial Bond-(Renewable Energy Facilities Manufacturing)" (Green Bond) would be issued by China Development Bank, with a scale not exceeding RMB 12 billion (including RMB 12 billion). Renewable Facilities Manufacturing, Low Carbon Transport and Renewable Energy Projects would be used by the net proceeds.

Verification Institution

China Lianhe Equator Environmental Impact Assessment Co., LTD. (Lianhe Equator) was established in 2015, which primarily engaged in green bond third-party certification, green financial advisory and environmental impact assessment business. The core technical force included a great number of senior environmental protection experts at the provincial and ministerial level, many registered consultants, financial analysts and more than sixty registered environmental impact assessors who have the leading green financial advisory service capabilities in the industry. The Lianhe Equator standardizes the specific certification work with the *Green Bond Assessment and Certification Method System (LEIS0002-2021)* was independently developed. The

Lianhe Equator also have conducted this limited assurance engagement in accordance with the *International Standard on Assurance Engagements 3000 (ISAE 3000)*: Assurance Engagements other than Audits or Reviews of Historical Financial Information. In addition, the comprehensive performance of green bond from four dimensions, which were the characteristics of the project, the using and management of the net proceeds, the project evaluation screening and the information disclosure was evaluated. Ultimately, the green bond was evaluated and certified by it.

Verification Work

Verification Contents

Verification contents of Lianhe Equator about China Development Bank 2022 Green Financial Bond following aspects was included that:

- Policies and procedures of the using and management of proceeds.
- Evaluation and screening of project standards, green attributes and compliance.
- Information disclosure and process.

Standard

- Climate Bonds Standard v3.0
- Climate Bonds Standard Sector Criteria (Solar Version 2.1);
- Climate Bonds Standard Sector Criteria (Wind Version 1.2);
- Climate Bonds Standard Sector Criteria (Low Carbon Transport Version 2.0).

Responsibilities

Issuers responsibilities were included the following aspects:

- Accept on-site interviews and due diligence by the verification agency team.
- Provide relevant information data and system documents for the certification work of verification agency.
- Provide relevant information documents for the recruitment and investment projects for the certification work of verification agency.
- Ensure that the supplied information data and system documents real and

effective.

Verification agencies responsibilities were including the following aspects:

- Conduct on-site interviews and due diligence, which is based on the information data, system documents and information documents provided by issuer.
- Issue the verification report and limited assurance conclusion on whether the invested projects meet the climate bond standards.

Lianhe Equator conducted the verification in accordance with the *Climate Bond Standard Version 3.0* and refer to the *International Standard on Assurance Engagements 3000 (Revised) – Assurance Engagements other than Audits or Reviews of Historical Information.*

Overview of Nominated Projects

Table 1

No.	Project	Region	Project Total Investment (RMB billion)	Plan to Invest (RMB billion)	Categories	Project Description
1	Renewable Facilities Manufacturi ng Project	Northern China	2.12	0.815	Renewable energy	The project is a solar energy facilities manufacturing project. The project is located in Shanxi Province of China, it is currently in the construction phase and the manufacturing capacity will be the 16GW of high-efficiency monocrystalline silicon cells annually.
2	Renewable Facilities Manufacturi ng Project	Northern China	8.69	0.40	Renewable energy	The project is a solar energy facilities manufacturing project. The project is located in Inner Mongolia Region of China, it is currently in the construction phase and the manufacturing capacity will be 100,000 tons of polysilicon annually.

						The project is a low
3	Low Carbon Transport	Eastern China	4.00	1.00	Low carbon transport	carbon transport facilities manufacturing project. The project is located in Jiangsu Province of China, it is currently in the construction phase and the manufacturing capacity will be 10 GWh of lithium iron phosphate batteries.
4	Renewable Facilities Manufacturi ng Project	Northwest China	5.00	0.20	Renewable energy	The project is a solar energy facilities manufacturing project. The project is located in Ningxia Region of China, it is currently in the construction phase and the manufacturing capacity will be 50,000 tons of high-purity polysilicon annually.
5	Renewable Facilities Manufacturi ng Project	Northwest China	15.00	0.20	Renewable energy	The project is a solar energy facilities manufacturing project. The project is located in Ningxia Region of China, it is currently in the construction phase and the manufacturing capacity will be 150,000 tons of high-purity polysilicon annually.
6	Solar Energy Project	Northwest China	1.04	0.20	Renewable energy	The project is located in Gansu Province of China, it is currently in the construction phase and the installation capacity will be 200MW.
7	Solar Energy Project	Northern China	1.30	0.60	Renewable energy	The project is located in Shandong Province of China, it is currently in the construction phase and the installation capacity will be 300MW.
8	Wind Energy Project	Northeast China	2.88	0.70	Renewable energy	The project is located in Inner Mongolia Region of China, it is currently in the construction phase and the installation capacity will be 400MW.

						The project is located in
9	Wind Energy Project	Northeast China	2.995	1.10	Renewable energy	Inner Mongolia Region of China, it is currently in the construction phase and the installation capacity will be 500MW.
10	Wind Energy Project	Northeast China	6.51	2.20	Renewable energy	The project is located in Inner Mongolia Region of China, it is currently in the construction phase and the installation capacity will be 1100MW.
11	Solar Energy Project	Southwest China	0.58	0.46	Renewable energy	The project is located in Guangxi Province of China, it is currently in the construction phase and the installation capacity will be 150MW.
12	Wind Energy Project	Northeast China	4.11	2.00	Renewable energy	The project is located in Jilin Province of China, it is currently in the construction phase and the installation capacity will be 500MW.
13	Solar Energy Project	Northeast China	1.50	0.50	Renewable energy	The project is located in Tianjin of China, it is currently in the construction phase and the installation capacity will be 260MW.
14	Wind Energy Project	Northeast China	0.72	0.425	Renewable energy	The project is located in Heilongjiang Province of China, it is currently in the construction phase and the installation capacity will be 100MW.
15	Wind Energy Project	Northeast China	0.74	0.25	Renewable energy	The project is located in Heilongjiang Province of China, it is currently in the construction phase and the installation capacity will be 100MW.
16	Solar Energy Project	East China	0.99	0.10	Renewable energy	The project is located in Jiangxi Province of China, it is currently in the construction phase and the installation capacity will be 250MW.

17	Solar Energy Project	Northwest China	10.30	1.00	Renewable energy	The project is located in Ningxia Region of China, it is currently in the construction phase and the installation capacity will be 2 million kilowatts.
18	Solar Energy Project	Southwest China	2.98	0.20	Renewable energy	The project is located in Yunnan Province of China, it is currently in the construction phase and the installation capacity will be 550MW.
19	Solar Energy Project	Southwest China	2.39	0.08	Renewable energy	The project is located in Yunnan Province of China, it is currently in the construction phase and the installation capacity will be 450,000 kilowatts.
20	Solar Energy Project	Southwest China	1.34	0.10	Renewable energy	The project is located in Yunnan Province of China, it is currently in the construction phase and the installation capacity will be 240,000 kilowatts.
21	Solar Energy Project	China	1.00	0.375	Renewable energy	The project is ready to start construction this year and will be constructed by Sungrow Power Supply Co.,Ltd.

Pre-Issuance Requirements and Verification found

Table 2

1. Use of Proceeds						
Climate Bonds Standard Requirement	Findings	Requirement Met				
1.1 The Issuer shall document the Nominated Projects & Assets which are proposed to be associated with the Bond and which have been assessed as likely to be Eligible Projects & Assets. The Issuer shall establish a list of Nominated Projects & Assets which can be kept Up To Date during the term of the Bond.	The issuer has established a Nominated Projects & Assets List for Eligible Projects & Assets. The list of projects will be continuously updated during the term of the bond.	Yes				
1.2. The expected Net Proceeds of the Bond shall be no greater than the Issuer's total investment exposure to the proposed Nominated Projects & Assets, or the relevant proportion of the total Market Value of the proposed Nominated Projects & Assets which are owned or funded by the Issuer.	The expected Net Proceeds of the Bond will not greater than RMB 12 billion. The total amount of the listed project is	Yes				

	RMB 12.91 billion. Therefore, it is expected that the Net Proceeds of the bond will not exceed the Issuer's total investment exposure to the proposed Nominated Projects & Assets.	
 1.3 Nominated Projects & Assets shall not be nominated to other Certified Climate Bonds, Certified Climate Loans, Certified Climate Debt Instruments, green bonds, green loans or other labelled instruments (such as social bonds or SDG bonds) unless it is demonstrated by the Issuer that: 1.3.1 Distinct portions of the Nominated Projects & Assets are being funded by different Certified Climate Bonds, Certified Climate Loans, Certified Climate Debt Instruments, green bond, green loans or other labelled instruments or; 1.3.2 The existing Certified Climate Bond, Certified Climate Loan or Certified Climate Debt Instrument is being refinanced via another Certified Climate Bond, Certified Climate Loan or Certified Climate Debt Instrument. 	Nominated Projects & Assets will not nominated to other Certified Climate Bonds, Certified Climate Loans, Certified Climate Debt Instruments, green bonds, green loans or other labelled instruments.	Yes

2. Process for Evaluation and Selection of Projects and Assets

Climate Bonds Standard Requirement	Findings	Requirement Met			
2.1. The Issuer shall establish, document and maintain a decision-making process which it uses to determine the eligibility of the Nominated Projects & Assets. The decision-making process shall include, without limitation:	The issuer has established the responsibilities and decision-making process, refer to China Development Bank Green Bond Management Framework (the "Framework").	Yes			
2.1.1. A statement on the climate-related objectives of the Bond.	For this issuance, the net proceeds of the climate-related objectives of the Bond will be invested into the low carbon projects to conform with the objective of low carbon economy. The detailed statement will be specified in the prospectus.	Yes			
2.1.2 How the climate-related objectives of the Bond are positioned within the context of the Issuer's overarching objectives, strategy, policy and/or processes relating to environmental sustainability.	The issuer is a policy bank, it is positioned in the strategy of serving the country, and financial resources are towards green finance and environmental sustainability. The climate-related objectives of the bond conform to the issuer's policy and strategy.	Yes			
2.1.3 Issuer's rationale for issuing the Bond.	This issuance aims to promote the low carbon economy development. The detailed description will be specified in the	Yes			

	prospectus.	
2.1.4 A process to determine whether the Nominated Projects & Assets meet the eligibility requirements specified in Part C of the Climate Bonds Standard.	Specified in the Use of Proceeds, Project Evaluation and Selection part of the Framework.	Yes
2.2 Issuer should include under Clause 2.1 further aspects of the decision-making process, including:	By reviewing the Framework, we found that the issuer has include under Clause 2.1 further aspects of the decisionmaking process.	Yes
2.2.1 Related eligibility criteria, including, if applicable, exclusion criteria or any other process, applied to identify and manage potentially material environmental, social or governance risks associated with the Nominated Projects & Assets.	The issuer has established related eligibility criteria and system, managed the nominated projects & assets from environmental and social risks aspects. The detailed description will be specified in the prospectus.	Yes
2.2.2 Green standards or certifications referenced in the selection of Nominated Projects & Assets.	Specified in the Use of Proceeds part of the Framework.	Yes
2.2.3 The issuer shall assess that all proposed Nominated Projects & Assets to be associated with the Bond meet the documented objectives as stated under Clause 2.1.1 and are likely to conform to the relevant eligibility requirements under Part C of the Climate Bonds Standard.	The proposed Nominated Projects & Assets to be associated with the Bond meet the documented objectives as stated under Clause 2.1.1 and are likely to conform to the relevant eligibility requirements under Part C of the Climate Bonds Standard.	Yes
2 Management of Duran	1	

3. Management of Proceeds

Climate Bonds Standard Requirement	Findings	Requirement Met
3.1 The systems, policies and processes to be used for management of the Net Proceeds shall be documented by the Issuer and disclosed to the Verifier, and shall include arrangements for the following activities:	The issuer has engaged the independent third party-Lianhe Equator Environmental Impact Assessment Co., LTD. to conduct pre-issuance assurance, also the issuer will conduct post-issuance assurance. The systems, policies and processes to be used for management of the Net Proceeds are documented by the Issuer and disclosed to the third party.	Yes
3.1.1 The Net Proceeds of the Bond can be credited to a sub-account, moved to a sub-portfolio, or otherwise tracked by the Issuer in an appropriate manner and documented.	By reviewing the Framework, the issuer has defined the responsibility on the use and management of proceeds. The issuer will maintain a ledger to keep track of the use of proceeds.	Yes
3.1.2 The balance of unallocated Net Proceeds can be managed as per the requirements in Clause 7.3.	By reviewing the Framework, the balance of	Yes

	11 / 131 / D 1	
	unallocated Net Proceeds will be documented in the	
	ledger.	
	Any balance of issuance	
	proceeds which are not	
	allocated will be invested in	
	Green Bonds (the bonds will	
	NOT be related to	
	greenhouse gas intensive	
	projects which are	
	inconsistent with the	
	delivery of a low carbon and	
	climate resilient economy)	
	issued by non-financial	
	institutions, and in money	
	market instruments with	
	good market liquidity.	
	By reviewing the	
	Framework, the issuer will	
	maintain a ledger to manage	
3.1.3 The earmarking process can be used to manage and account for	and account for funding to	
funding to the Nominated Projects & Assets and enables estimation	the Nominated Projects &	Yes
of the share of the Net Proceeds being used for financing and	Assets and enable	
refinancing.	estimation of the share of	
	the Net Proceeds being used	
	for financing;

Verification and Conclusion

Verification Opinions

China Development Bank Green Bond Management Framework which issued by CDB has reviewed by Lianhe Equator. Lianhe Equator has interviewed the leadership and relevant responsible department of CDB. In addition, it was not found any discrepancies of CDB in the using and management of proceeds, project evaluation and screening, information disclosure and reporting.

Limited Assurance Conclusion

This Green Bond issuance scale will not exceed RMB 12 billion, including 21 nominated projects which are Low carbon transport and Renewable energy. The total amount which will invest will be RMB 12.91 billion which cover the green bond issuance quota. Based on the limited assurance procedures conducted, nothing has come to Lianhe's attention that causes us to believe that, in all materials aspects, China Development Bank 2022 Green Financial Bond-(Renewable Energy Facilities Manufacturing) is not in conformance with the requirements of the Climate Bonds Standard Version 3.0.

Statement

The copyright of the verification suggestions belongs to the verification agency and the issuer can publish the suggestions after obtaining the permission of the verification agency.

Except for the principal relationship between the verification authority and the issuer, there is no relationship among the verification authority, the verification

personnel and the issuer that influences the independence, objectivity and impartiality

of the verification action.

The conclusion of this verification report is that on the basis of sufficient

investigation, reasonable evidence collection and comprehensive analysis, the

verification agencies make independent judgments according to reasonable standards

and procedures without changing their verification suggestions due to the improper

influence of issuers and any other organizations or individuals.

The primary purpose of this verification is to verify the purpose and management

of the green bond fund-raising, project evaluation and screening, and information

disclosure. It only provides information support in the above fields. The verification

agency does not accept liability for damages arising from erroneous or incomplete

information from the issuer.

In this verification, the issuer is responsible for the completeness, accuracy and

timeliness of the verification suggestions, which are based on the information provided

by the issuers.

There are some inherent limitations in this verification process. For example, it

may be difficult to detect fraud, errors and irregularities if the verification is conducted

only on selected information.

This verification suggestion can not be interpreted as any indication or guarantee

for relevant bond investment decisions. In any case, this suggestion can not be used as

an explanation or guarantee for the actual situation of bond economic performance,

credit evaluation and fund-raising purposes.
