

NORDEX GREEN SCHULDSCHEIN

DNV GL POST ISSUANCE ASSURANCE OPINION

Scope and objectives

Nordex SE ("NORDEX" or "Issuer") has issued a Schuldschein in Euro (henceforth referred to as "SCHULDSCHEIN") and has achieved Pre Issuance Certification against the Climate Bonds Standard (CBS). NORDEX has submitted the SCHULDSCHEIN to DNV GL Business Assurance Pty Ltd ("DNV GL") for Post Issuance Verification.

NORDEX used the proceeds of the SCHULDSCHEIN to finance a nominated projects and assets falling under the following category:

- Renewable Energy –Wind

DNV GL Business Assurance Australia Pty Ltd (henceforth referred to as "DNV GL") was commissioned by NORDEX to provide verification of the BOND as an independent and approved verifier under the Climate Bond Standard. Our criteria and information covered to achieve this is described under 'Work Undertaken' below.

No assurance is provided regarding the financial performance of the BOND, the value of any investments in the BONDS, or the long term environmental benefits of the transaction. Our objective has been to provide an assessment that the BOND has met the criteria of the Climate Bond Standard and the associated Technical Criteria on the basis set out below. The opinion offered is based upon the information provided to DNV GL up to the date of this Verification Opinion only.

The scope of this DNV GL opinion is limited to the Climate Bond Standard Version 2.1 and the following associated Sector Technical Criteria:

- Wind

Responsibilities of the Management of NORDEX and DNV GL

The management of NORDEX has provided the information and data used by DNV GL during the delivery of this review. Our statement represents an independent opinion and is intended to inform NORDEX management and other interested stakeholders in the SCHULDSCHEIN as to whether the established criteria have been met, based on the information provided to us. In our work we have relied on the information and the facts presented to us by NORDEX. DNV GL is not responsible for any aspect of the nominated assets referred to in this opinion and cannot be held liable if estimates, findings, opinions, or conclusions are incorrect. Thus, DNV GL shall not be held liable if any of the information or data provided by NORDEX's management and used as a basis for this assessment were not correct or complete.

Basis of DNV GL's opinion

DNV GL has conducted the verification against the CBS v2.1 and associated Sector Technical Criteria through the creation and execution of a verification protocol addressing each requirements of the CBS v2.1 and the associated Sector Technical Criteria. The detail of areas covered in the DNV GL verification is summarised in Schedule 2 below.

Work undertaken

Our work constituted a level review of the available information, based on the understanding that this information was provided to us by NORDEX in good faith. We have not performed an audit or other tests to check the veracity of the information provided to us. The work undertaken to form our opinion included:

- Creation and execution of a Climate Bonds Standard Protocol, adapted to include the relevant Sector Technical Criteria for the SCHULDSCHEIN nominated projects and assets, as described above and in Schedule 2 to this Assessment;
 - Assessment of documentary evidence provided by NORDEX on the SCHULDSCHEIN and supplemented by a high-level desktop research, documentation review and interviews with key personnel from the issuer NORDEX and their deal arranger, Uni-Credit. These checks refer to current assessment best practices and standards methodology;
 - Discussions with NORDEX management, and review of relevant documentation;
 - Documentation of findings against each element of the criteria. Our opinion as detailed below is a summary of these findings.
-

Findings and DNV GL's opinion

DNV GL has performed the Post Issuance Verification of the NORDEX Green Schuldschein. It is DNV GL's responsibility to provide an independent verification statement on the compliance of the NORDEX Green Schuldschein with the Climate Bonds Standard.

DNV GL conducted the verification in accordance with the Climate Bonds Standard Version 2.1 and with International Standard on Assurance Engagements *3000 Assurance Engagements other than Audits or Reviews of Historical Information*. The verification included i) checking whether the provisions of the Climate Bonds Standard were consistently and appropriately applied and ii) the collection of evidence supporting the verification.

DNV GL's verification approach draws on an understanding of the risks associated with conforming to the Climate Bonds Standard and the controls in place to mitigate these. DNV GL planned and performed the verification by obtaining evidence and other information and explanations that DNV GL considers necessary to give limited assurance that the NORDEX Green Schuldschein meets the requirements of the Climate Bonds Standard.

Based on the limited assurance procedures conducted, nothing has come to our attention that causes us to believe that the NORDEX Green Schuldschein is not, in all material respects, in accordance with the Post Issuance requirements of the Climate Bonds Standard Version 2.1 and Associated Wind Technical Criteria.

for DNV GL Business Assurance Australia Pty Ltd

SCHEDULE 2: VERIFICATION CRITERIA

Summary criteria for assertions of compliance with the Climate Bond Standard v2.1

The criteria against which NORDEX and its nominated projects and assets have been reviewed prior to inclusion in the Bond are grouped under the requirements as detailed within the Climate Bond Standard Version 2.1 including:

Part A: General Requirements

Area	Requirement
Project Nomination	The Climate Bond issued must specify the project collateral or physical assets with which it is associated
Use of Proceeds	Proceeds must be allocated to Nominated Project(s)
Non-Contamination	Issuers are permitted a grace period to allocate or re-allocate funds to Nominated Project(s)
Confidentiality	The information disclosed to the Verifier and the Climate Bond Standards Board may be subject to confidentiality arrangements
Reporting	Reporting on use of proceeds and nominated projects and assets

Part B: Low Carbon Contribution - Eligible projects and physical assets

Nominated projects and assets include financing of or investments in equipment and systems which enable the mitigation of greenhouse gasses, as detailed in Appendix B.

Area	Requirement
Wind Energy Generation	<p>Eligible Project & Assets relating to wind energy generation shall be projects & assets that operate or are under construction to operate in one or more of the following activities:</p> <ul style="list-style-type: none"> The development, construction and operation of wind farms

	<ul style="list-style-type: none"> • Operational production or manufacturing facilities wholly dedicated to wind energy development • Wholly dedicated transmission infrastructure for wind farms.
--	--

Part C: Bond structures

Area	Requirement
Traceability	The financial flows of the bond principal must verifiably remain between the Climate Bond and the linked Nominated Project(s)
Project Holding	The issuer of a Corporate Climate Bond with Nominated Projects linked to a portfolio of assets must continue to hold eligible assets at least equal to the Fair Market Value at the time of issuance of the original principal
Confidentiality	The information disclosed to the Verifier and the Climate Bond Standards Board may be subject to confidentiality arrangements
Settlement Period	Climate Bond issuing entities must demonstrate that the proceeds of a Climate Bond have been allocated to the Nominated Project(s) within 24 months after the bond is issued
