

Media Release

Registration Opens for Climate Bonds Conference21

The must-attend event for global leaders who play a part in mobilising global debt capital markets to finance climate, green and transition investment

LONDON: 12/08/2021 11:00 BST: The Climate Bonds Initiative announced dates and theme for the sixth annual [Climate Bonds Conference](http://climatebonds.net/conference). **Climate Bonds Conference21** will be held on 6-10th September 2021 against the theme of *The 2030 Green Window - Framing a Sustainable Future*. The theme reflects the conference's focus on the narrow window of opportunity for the world to act in the face of the climate emergency and meet 2030 decarbonisation targets.

[Registration for the sessions is now open.](http://climatebonds.net/conference)

The **Climate Bonds Conference21** brings together global organisations and investors, regional actors and market leaders to deliver beyond recovery. Resilience, emissions reduction targets and transition top the agenda. Generating USD1trillion plus per year in green capital flows to support climate transition is the immediate goal.

The **Climate Bonds Conference21** will be held entirely online and span across 5 days, the largest event we have ever hosted. The event will be conducted in English, and live translation will be available in Spanish, Portuguese and Mandarin.

Since 2016, the Climate Bonds Annual Conference has grown into pivotal event for mobilising global debt capital markets to finance climate, green and transition investment. Through a forward oriented agenda focused on building green and sustainable investment flows via debt capital markets the Climate Bonds Conference has built engagement and action between private and public sectors, aligning policy and market actors to create momentum towards trillions in investment.

The **Climate Bonds Conference21** is a continuation of this direction.

Discounts are available for participants from the Emerging Markets.

Sean Kidney, CEO, Climate Bonds Initiative:

“The challenge before our natural world is monumental, requiring a fast and thorough reimagination of the relationship between economy and environment. We need serious ambition from governments to investors, to industry leaders, and the Climate Bonds annual conference has long provided the necessary platform for cooperation and thought leadership from these key stakeholders.”
